

Total School Buses in New York 1980-1997¹: Mandating Seatbelts Had No Impact on NY Bus Sales

What Do School Buses Have To Do With Microstamping?

Just as there was no negative impact on the number of buses sold to New York school districts by mandating seat belts, the same will be true of firearm sales in New York if microstamping is introduced.

New York is the third most populous state in the U.S. with over 19 million people², 18% of New York households own firearms and New York³ has the 9th largest amount of gun owners in the country⁴. Microstamping will not hurt gun sales in New York as gun manufacturers don't want to hurt their bottom line.
